**Subject:** SALCC Natural Resource Indicator process approved

---

Hi surrounding LCC staff,

Just wanted to give you a heads up that the SALCC Natural Resource Indicator process was approved this morning (attached). In January, there will be a chance for your LCCs to score the potential indicators based on the chances they'd work as shared indicators across LCC boundaries. The idea is to give extra weight towards indicators that have strong potential for being shared across LCC boundaries. More info to come over the next month or so.

Rua
